

Att.: Serialization lead

September 2018

Dear Manufacturer,

The implementation date of the EU Directive on Falsified Medicines 2011/62/EU (FMD) is approaching and we are currently implementing the requirements according to the regulation. Furthermore, we are also experiencing an increasing number of packages with 2D barcodes - and thus GTINs.

In order to accelerate the goods receipt we prefer to register the new GTINs in our ERP-system prior to receiving the goods. Therefore, as your full-line wholesaler we need you to fill in the attached excel sheet with information about your new GTINs once a month - or when you create larger quantities of new GTINs – and send it to us.

The GTINs registered in the excel sheet must be 14 digits. If it is less than 14 digits, please add leading zeroes.

We kindly ask you to provide us with the information as described above until February 9, 2019. Please send the filled in excel sheet by email to stregkoder@tmj.dk and barcode@nomeco.dk and please note 'New barcode' in the subject field.

Thank you very much in advance.

Best Regards,
MEGROS

Henrik Kaastrup
Chairman
