

**LETTER OF ANNOUNCEMENT**  
**EAMS Upcoming Releases in 2023 – AMS Cybersecurity 1**

16<sup>th</sup> June 2023

Further to the [Letter of Announcement](#) from May 2023 and following the successful progression of the testing activities, we are pleased to confirm the deployment date of the upcoming **AMS Cybersecurity 1 (Hub V3.0.0 – Portal V2.3.0) Release** and provide further details:

- PRD currently planned for **June 27, 2023**

The changes included in the **AMS Cybersecurity 1 Release** can be found [here](#). Of note, AMS Cybersecurity 1 includes a new feature for AMS Organisations connected to the AMS Hub via APIs: “**Secret expiration management**”.

**If you are connected to the AMS Hub via a direct API connection**, with this Release you will be able to check the expiry date of your AMS Organisation’s secrets and to renew them by following the steps defined in [this document](#).

**Renewing the secrets is required to keep accessing the AMS Hub after the secrets’ expiration dates.**

If you are connected to the AMS Hub via the AMS Portal (you use the AMS Portal for managing the alerts), you do not need to take any action.

If you are an OBP interested in using the EAMS, please consult [this document](#) which summarises all the steps for a smooth and effective on-boarding.

To answer any questions regarding the EAMS and the on-boarding steps, EMVO is organising a Q&A session with a short demo on **Thursday 29<sup>th</sup> June from 14:00 to 15:00 CEST**. The meeting will be recorded and uploaded later. To register, please click [here](#).
